Category: ReverbRUNX3 Runt-related transcription factor 3 is a protein that in humans is encoded by the RUNX3 gene. The protein encoded by this gene is a transcriptional regulator that belongs to the family of transcription factors called the Runt domain. It is part of a complex with the other Runt domain proteins RUNX1 and RUNX2. This complex is involved in the regulation of cell proliferation and differentiation. The encoded protein can interact with histone deacetylase 1 and RUNX2 and may be responsible for the deacetylation of RUNX2. The protein interacts with the transcription coactivator PGC-1 α and represses the expression of the pro-apoptotic factor BCL2. Two alternatively spliced transcript variants have been found for this gene. Interactions RUNX3 has been shown to interact with: AP-2alpha, BRD3, HDAC1, RUNX2, and TP53.
