I have a section in my layout that displays 3 statistics. I have a ViewModel that contains the statistic that I would like to pass to the view. I am using a repository to populate the model from the database. public class StatisticsRepository { public UserDetailsViewModel FindAll() { var stats = (from u in db.Users join ud in db.UserDetails on u.ID equals ud.ID where u.UserID == UserDetails select new { u.FirstName, 2d92ce491b
