I am using Ruby 1.9.2. Thanks. A: If you only want to remove the characters between the last period and the first comma, you can use the string.sub method with a regex like '.*(,|\.)'. A: str.sub(/^.*?(,|\.)/, '') This removes everything up to the first, or the first period, whichever occurs first. if str =~ /^.*?(,|\.)/ # do something else # do something else end Note that str must not be an array.
