To create a new design canvas, click the New Design Canvas icon in the top toolbar (as shown in the first image). Creating a design canvas is the first step in creating any model. The design canvas is the primary tool used to create a model and display the model on the display. It is the starting point for all the drawing and editing that the user will do. In addition, there are two other types of design canvases: Annotation Canvas can contain annotations, such as text boxes or lines.
