Q: Regex:Match whole word that includes new line Hi I would like to match string that include new line like this: from "123" to "123 " to "123 " etc. I tried this pattern [^ ]\w\*\$ but it matches only first "123". 123.txt from "123" to "123 " to "123 " I expect the output to be: 123.txt: from "123" to "123 " to "123 " Thank you. A: You should escape your \ so it matches in the string, not in the regex: [^\ ]\w\*\$ Also, your [^ ] doesn't work because is a string literal, not a regex literal. It just matches \. Q: Mysql | Join 2 tables and return max value I have 2 tables: Vouchers: --id-- --code-- --expires\_at-- --paid-- --status-- and the other is: Recipes: --id-- --date-- --recipe-- I want to get the max amount of the paid rows in the "Vouchers" table, but I also want to have the MAX(date) in the results. As I can get the date, I can find the amount. SELECT MAX(amount) FROM vouchers WHERE code='sd1' GROUP BY code Any ideas? A: Something like this should work: SELECT v.id, v.code, v.expires\_at, v.paid, v.status, r.date FROM vouchers v JOIN recipes r ON v.id = r.id WHERE v.code='sd1' ORDER BY v.paid DESC LIMIT 1

If you're interested in golf or playing with a group of new golfers, you might be interested in our new Member Package. Starting as low as \$399 per person for the basic program, your guests will receive a round of golf, lunch and a range of other goodies at Half Moon Bay Golf and
