Session Buddy Crack+ Free

Session Buddy is a small yet useful Google's Chrome extension that allows you to quickly save and restore tabs, acting as a unified session and bookmark manager. Session Buddy can be used for saving open tabs and restoring them later to avoid memory clutter. It can also be used to manage saved tabs by topic, organize saved tabs in one place, and search stored sessions. Moreover, Session Buddy can be used to share interesting pages with your friends. First off, drag and drop tabs from any of your open tabs to save them. Since session saving and restoring is supported, there is no need to re-start any running programs. Session Buddy can also be used to grab URLs from your clipboard or a file. All that these new tabs do is save whatever URL you have in your clipboard. Aside from that, they are essentially the same as any other unread tab. You can simply restore them later by choosing the relevant tab from your tabs list. You can also select one of the saved sessions to open it directly from that list. Once you've got the hang of it, you can even drag and drop different tabs into a single session. It is also available for Macs. Please use it wisely. How to install Session Buddy: Step 1: If you have Chrome browser, you should already have the latest version installed. If you don't, you can download the extension here. Step 2: Head to your extensions page, click the "+" button, and choose Install from file. Step 3: Save session buddy.crx to your desktop and click Open. Step 4: After completion, you should see Session Buddy icon in your Extensions page.
