KEYMACRO requires at least Windows 2000/XP/Vista/7 or Mac OS 9 or later. Q: Object Oriented Program design in C# I want to know which would be better design, each is object oriented and another is traditional and separated using #pragma once. Example: FuncA() //In folder Call/ ClassA() //In folder Class/ FuncA.cs //In folder Call/Call.cs ClassA.cs //In folder Class/Class.cs A: If it is .net language I prefer Object Oriented approach. If you are .net beginner its better to go for a classic way. Q: Is "You should've kept up with your improvements!" equivalent to "You should've kept up with your improvement!"? Is "You should've kept up with your improvements." equivalent to "You should've kept up with your improvement." ? I'm confused because both sentences seem correct to me, but maybe I'm thinking differently. A: It's one way to say it, but "Keep up with your improvement" is not idiomatic. If you were looking to express a similar sentiment, you would simply say "You should have kept up with your improvement." As a hint, "keep up" is an idiom. It refers to being consistent with something - for example, "You should've kept up with your homework." A: "Keep up with" is usually a verb in its own right, as in, "Keep up with your homework." "Improve" is often used as a verb, but there are cases where it is not, and it seems 1d6a3396d6
